Office Action Summary	Application No. 10/706,557	Applicant(s) VOEGELE, WILLIAM P.	
	Examiner Robert J. Miller	Art Unit 3635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-10 in the reply filed on August 3, 2006 is acknowledged. Claims 11-24 stand withdrawn from consideration as non-elected invention.

Priority

It is noted that this application appears to claim subject matter disclosed in prior Application No. 60/424,706, filed November 8, 2002. The reference to provisional application is incorrect. Appropriate correction is required.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,402,168 Maier. Maier '168 discloses a clip assembly 10 [fig 3] having a first clip member 10b and second clip member 10a each with upright members 42 and 36, lower flanges 44 and 38 extending in the same direction, upper flanges 26b and 26a, with a gap between said upright members. The phrase "wherein the first clip member and the second clip member constrain adjoining panels of the panel system against forces" is a recitation of intended use, which does not further limit the structural features of the

Art Unit: 3635

claimed invention. It has been held that a recitation, regarding the manner in which a claimed apparatus is intended to be used does not differentiate the claimed apparatus from a prior art apparatus which satisfies the claimed structural limitations (Ex Parte Masham, 2 USPQ F2nd 1647, 1987).

In regard to claims 2-3, upper flange extensions 32 are free of contact with the panels 16 until the extensions are closed [c4, l16].

In regard to claims 4-5, movement is allowed between adjoining panels in both longitudinal and transverse directions [c2, l26-34; c4, l4-6].

In regard to claim 6, lower flange members of first clip member 44 and second clip member 38 are both provided with holes there through [fig 3].

Allowable Subject Matter

Claims 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
